MANAGEMENT DISCUSSION

ECONOMIC BACKDROP

Jamaica

The Jamaican government's recent budget for FY 2025/2026, themed "Resilient Jamaica: Strengthening Growth, Securing Our Prosperity", emphasized fiscal discipline with no new taxes amidst positive economic indicators like a record-low 3.5% unemployment rate and a projected debt-to-GDP ratio of 68.7%. The Budget was focused on maintaining financial stability while strategically investing in social programs and economic growth initiatives.

Macro Economic Indicators

Inflation showed signs of stabilization within the Bank of Jamaica's (BOJ) target range of 4.0% to 6.0%. Annual headline inflation amounted to 4.96% as at March.

In December 2024, the BOJ made the decision to reduce the policy rate by 25 basis points (bps) to 6%. Since then, the BOJ has maintained the policy rate at 6% for the past 3 consecutive BOJ Monetary Policy Committee (MPC) meetings.

This decision was made, despite inflation continuously showing stability within the BOJ's target range of 4% to 6%. However, BOJ's caution could be attributable to potentially higher inflation due to global economic challenges.

According to the BOJ, real Gross Domestic Product (GDP) for the Jamaican economy is estimated to have declined by 0.7% in the fourth quarter of 2024. This was driven by the impact of Tropical Storm Raphael and Hurricane Beryl in July 2024. This change greatly impacted the Agriculture, Forestry, and Fishing Industries. The Electricity & Water Supply sectors as well as the Hotel & Restaurants industries also saw declines due to infrastructural damage, and reduced visitor arrivals, respectively. The BOJ projects GDP growth of 2.2% by the end of the 2025/26 FY. However, there are risks to the current outlook, based on a weaker global economic outlook.

MANAGEMENT DISCUSSION

ECONOMIC BACKDROP

Barbados

The Barbadian economy demonstrated robust growth, recording a 4% increase in real GDP in 2024. This expansion was primarily driven by strong performances in the tourism, business services, retail and construction sectors. This growth, coupled with declining inflation and unemployment, improvements in the labour market, and a record level of international reserves, reflects the positive impact of economic reforms. The government's fiscal position significantly improved, leading to a reduced debt-to-GDP ratio, while a stable financial sector further bolstered economic resilience. Looking ahead to 2025, Barbados anticipates continued growth, although external uncertainties and potential risks remain.

United States of America

The US economy continued its expansion, with the 4th quarter of 2024 recording a 2.4% increase in real GDP at a seasonally adjusted annual rate, primarily driven by consumer spending, which rose by approximately 4.2%. However, regarding the projected economic performance for Q1 2025, forecasts indicate a notable slowdown in growth. The economy is expected to grow at a much slower pace, around 1.1% to 1.3% for the year 2025. This slowdown is attributed to increased uncertainty, trade tensions, and cautious business sentiment and evolving economic policies. Inflation is expected to rise in the medium term, and the Federal Reserve is likely to maintain interest rates throughout 2025. This has been reflected by significant dips in the major US stock indices as well as increased yields on fixed income instruments.

VMIL recorded consolidated revenues of \$633.69 million when compared to the corresponding prior year period of \$911.93 million. The results for Q1 2024 included a one off gain of \$422.27 million derived from the disposal of the Company's interest in its associate, Carilend. When normalized for the effect of this transaction, the Company delivered strong consolidated revenue growth of \$144.03 million or 29% over Q1 2024, with net fees and commissions being the main driver due to increased advisory and transaction-based activities during the period. The Company's Net interest income also showed significant improvement over the prior year corresponding period having climbed to \$91.74 million, up from \$31.40 million in Q1 2024. Overall Net fees and commissions improved by 43% when compared to Q1 2024.

Despite these positive movements, VMIL recorded a consolidated net loss during the period of \$32.5 million compared to net profit of \$510.2 million in the prior year corresponding period (\$87.9 million when normalized) reflecting increased costs associated with ongoing market headwinds, credit loss provisions, and staff expenses. This outturn included costs associated with a special restructuring exercise and the execution of our strategic initiative to on-board key personnel during the period to support expansion and drive revenue growth. The restructuring exercise was aimed at improving operational efficiency, and the Company is confident that it will derive long-term benefits from this initiative. Management continues to execute on its revenue and cost-saving initiatives while building out its transaction pipeline and, as a result of this, remains very optimistic about the Company's outlook.
